The Colorado Air Quality Control Commission's Regulation No. 1 requires that a fugitive emissions control plan be submitted by applicants whose source/activity results in fugitive particulate emissions. The control plan must enable the source to minimize fugitive emissions to a level that is technologically feasible and economically reasonable. If the control plan is not adequate in minimizing emissions, a revised control plan will be required unless it is determined that no technologically feasible and economically reasonable abatement measures exist. The control plan (if acceptable to the Division) will be used for enforcement inspection purposes.

Please check the control measures that you propose for your activity. A separate sheet may be attached explaining your specific control measures or activities if they differ from those listed in this form or if more space is needed. The Division will contact you if it feels that additional control measures are needed. The control measures you and the Division agree to be applied will be enforced.

**Control Measures:**

☐ Wet Blasting (Likely to be required by the Division)

☐ Enclosure Type: Complete or Partial

☐ Other (specify): \_\_\_\_\_

**Additional Comments**

Type of Material Used: \_\_\_\_\_

Amount of Material Used: \_\_\_\_\_ Tons Per Year

**Please provide description of the cleanup and disposal at the site:**
